Glue Kit	Part #
Glue Kit	VF-GLUE

DRIVE CHUCKS FOR DITCH WITCH DRILLS

- *Direct replacement for the one that came with your JetTrac*
- *Completely heat-treated alloy for maximum durability*
- *CNC Machined to be a perfect match with your drill rod*

Changing out worn sub-savers and drive chucks is an inexpensive and easy way to help get the maximum life out of your drill rod. If they are allowed to wear too much, then the drill rod thread will start to deform to the shape of the worn sub-saver threads. When attaching the drill rod to the sub-saver or chuck, be sure to torque it up to the correct pressure. And don't forget the Auntie C's thread lube!

Drive Chucks	
Drive Chucks for JetTrac	Part #
JT520 Version 1	DF-520F
JT520 Version 2	DF-520F-2
JT920, JT920L	DF-01AF
JT1720, JT1720 Mach 1	DF-86F
JT2020	DF-20F
